

Power-Flo®

Concentrated Diesel Fuel Winter Treatment

Beat the Cold

With cold winter temperatures comes the risk of diesel fuel gelling, filter icing and fuel line freeze up that can stop fleets in their tracks. Protect your diesel fuel with Power-Flo, a concentrated anti-gel and de-icer that keeps fuel flowing in low temperatures. Power-Flo modifies the shape and size of wax crystals in diesel fuel as they form to prevent filter plugging, and contains a powerful jet fuel de-icer that lowers the freezing point of entrained water to -18°F. Winterizing diesel fuel with Power-Flo is much cheaper and more effective than the use of kerosene or #1 diesel blends, which must be blended at high rates and lower the fuel's power density. Power-Flo can be used to treat all diesel fuels and bio-diesel blends to temperatures as low as -40°F, with effective treat ratios as low as 1:3000*.

BENEFITS

- Prevents fuel gelling, filter icing and fuel line freeze up
- Lowers CFPP of diesel fuel by up to 36°F
- Lowers freezing point of water to -18°F
- Improves fuel lubricity to prevent fuel pump and injector wear
- More effective than kerosene or #1 diesel blends
- Can be used in all diesel fuels and bio-diesel blends

**Treat ratios will vary depending on fuel composition and target CFPP improvement. Fuel analysis is recommended for ideal results.*

The wax crystals in untreated diesel fuel easily clog filters.

Cold Filter Plugging Point: 12° F

Treating with Power-Flo modifies wax crystals in diesel fuel to prevent filter plugging.

Cold Filter Plugging Point: -23° F

For optimal results, use with:

POWER KLEEN™

Give new life to your diesel fuel system! Power Kleen keeps the entire fuel system clean: powerful nitrogen cleaning molecules dissolve deposits of carbon, gum and varnish in fuel injectors, lines and tanks, and prevents their reformation.

POWER KLEEN™ ARCTIC

The cold weather version of Power Kleen, Power Kleen Arctic prevents low temperature fuel gelling and filter icing while keeping your entire fuel system clean. Powerful nitrogen cleaning molecules dissolve deposits of carbon, gum and varnish in fuel injectors, lines and tanks, and prevents their reformation.

DONALDSON CLEAN DIESEL KITS

Donaldson Clean Diesel Kits are the answer to your fuel cleanliness worries. You can't always control the cleanliness of diesel fuel delivered to you, but you can control how clean it is when you pump it into your vehicles and equipment. Donaldson Clean Diesel Kits are easy to install on any fuel dispenser and come with everything needed to filter out even the finest contaminants before they enter your equipment's fuel system. Provides filtration to ISO 14/13/11 diesel cleanliness in a single pass.

Hydrotex Clean Diesel Fuel Management is a data driven continuous improvement process implemented with the on-site user to overcome the chemical and physical deficiencies of diesel fuel for increased performance, reliability, sustainability, and profitability.

**TEST FUEL QUALITY • REMOVE EXISTING CONTAMINANTS
PREVENT FUTURE CONTAMINATION**

About Hydrotex®

Hydrotex® is a manufacturer and distributor of high performance lubricant and fuel improver solutions. As an employee owned company, we help our customers develop sustainable solutions designed to help improve system reliability, save energy, limit pollution, extend fixed asset life, reduce maintenance costs and improve fuel efficiency. Our products and services leverage over 80 years of innovation resulting in superior lubrication solutions.

The Hydrotex Warranty

When properly stored and used in accordance with instructions, any material not satisfactory will be replaced with any product in our line on a dollar for dollar basis provided the account is paid in full when due, and Hydrotex is notified, in writing, within 12 months of the date of the order by the customer.
